<b>Office Action Summary</b>	<b>Application No.</b> 09/930,029	<b>Applicant(s)</b> SWEET, WILLIAM B. ET AL.	
	<b>Examiner</b> Jeffrey D. Popham	<b>Art Unit</b> 2137	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Remarks***

Claims 1-58 are pending.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22 and 52-58, drawn to a method for setting access permissions for a user.
  - II. Claims 23-31 and 57-58, drawn to a method for setting access permissions to separate portions of the system.
  - III. Claims 32-51 and 57-58, drawn to a cryptographic method and system including maintenance tasks performed by an administrator.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as use in an email system, where the server decrypts information being sent to the user in such a way that only that user can ever have access to the email.

In the instant case, invention II has separate utility such as setting portions of the system to be available to the public, wherein the public does not have any security association or token.

In the instant case, invention III has separate utility such as use in a system where the administrator has to verify every user before the user can be granted a token and allowed access to the system.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I contains classification 709/206, which is not required for Groups II and III, Group II contains classification 711/153, which is not required for Groups I and III, and Group III contains classification 707/200, which is not required for Groups I and II, restriction for examination purposes as indicated is proper.
4. The multiple dependent claims 57 and 58 are placed in each group because they depend on the independent claims from each of the groups. When a group is elected, claims 57 and 58 will be edited to depend solely on those claims which are elected.
